Want to take your skating to the next level?

Our **Jets Winter 2023 Skills Program** is designed for dedicated U7/U8/U9/U11 players who want to become more than just an average player and to take their game to new heights. The Jets skills development program is designed to improve your hockey skills, compete level and skating and edge work, in a FUN, fast paced and rewarding environment.

Under the direction of our Hockey Program Director **Tim Preston** and lead instructor **Landen Matechuk**, RJMHA skills coach and former Jr A player, this 8-week program will focus on offensive and defensive skills, compete drills and skating mechanics and edge work.

Players will be placed in appropriate skill groups based on their division and skill level, in order to maximize the teaching efficiency and learning experience of each individual player.
